

CHANDRAKANTH P.

Azure Data Engineer | ADF | Databricks | PySpark | SQL | Python | Synapse Analytics | Snowflake

📞 7989632967 | ✉ chandrankanthad111@gmail.com |

CAREER OBJECTIVE

Highly motivated Azure Data Engineer with 4 years of overall experience. Seeking a challenging role where I can leveraging my skills in Azure Data Factory, Azure Databricks, PySpark, and SQL to design scalable data pipelines and deliver impactful data solutions. I thrive in collaborative, Agile environments and I am committed to continuous learning and contributing to organizational growth.

PROFESSIONAL SUMMARY

- 4 years of overall IT experience as an Azure Data Engineer working on enterprise-scale cloud data platforms.
- Hands-on experience with Azure Data Factory (ADF v2) —building Linked Services, Datasets, Pipelines, Mapping Data Flows, and Triggers for end-to-end data orchestration.
- Proficient in Azure Databricks (ADB) and PySpark for large-scale data processing, working with RDDs, DataFrames, Spark Transformations, and Actions.
- Strong SQL development skills including complex queries, stored procedures, views, functions, indexing, query optimization, and execution plan analysis in Oracle 11g/12c and Azure SQL Database.
- Experience with Azure Synapse Analytics and Microsoft Fabric (Lakehouse, Warehouse, Pipelines, Notebooks) for modern data warehousing and analytics workloads.
- Implemented dynamic and parameterized ADF pipelines with activities such as Get Metadata, Lookup, ForEach, Execute Pipeline, Set Variable, Filter, Until, and Wait for scalable data ingestion.
- Implemented secure credential management using Azure Key Vault and integrated Azure DevOps for CI/CD pipeline deployment and version control of data engineering workflows.
- Good exposure to Agile SDLC methodology — actively participating in Sprint Planning, Sprint Review, Sprint Retrospective, and Daily Scrum ceremonies.

TECHNICAL SKILLS

Cloud Platforms	Azure Data Factory (ADF v2), Azure Synapse Analytics, Azure Databricks (ADB), Azure Data Lake Storage Gen1/Gen2, Azure SQL Database, Azure Blob Storage, Microsoft Fabric
Programming	Python, PySpark, Scala, SQL, T-SQL
Data Warehousing	Azure Synapse Analytics, Snowflake, SQL Data Warehouse, Teradata, Oracle 11g/12c
Data Modelling	Star Schema, Snowflake Schema, Dimensional Modelling
Spark / Big Data	Apache Spark, RDDs, DataFrames, Spark Transformations & Actions
DevOps / Security	Azure DevOps (CI/CD), Azure Key Vault, Git, Version Control
ADF Components	Integration Runtime, Linked Services, Datasets, Pipelines, Mapping Data Flows, Triggers

Databases

Azure SQL Database, Oracle 11g/12c — DML, DDL, Stored Procedures, Views, Indexes, Query Optimization

Methodology

Agile / Scrum — Sprint Planning, Sprint Review, Retrospective, Daily Scrum

WORK EXPERIENCE

INFOSYS LIMITED

June 2022 – Present

Azure Data Engineer

Project: UPS (United Parcel Service) – Data Engineering & Analytics Platform

Environment: ADF, ADLS Gen2, Azure Synapse Analytics, Azure SQL Database, Azure Key Vault, Azure DevOps, Python, SQL, Scala

- Designed and developed scalable ETL/ELT data pipelines using Azure Data Factory (ADF v2) to ingest data from multiple heterogeneous source systems into Azure Data Lake Storage Gen2 (ADLS Gen2).
- Built and configured Linked Services, Datasets, Pipelines, and Activities in ADF to orchestrate end-to-end data ingestion, transformation, and workflow automation.
- Implemented data transformation and cleansing logic using ADF Mapping Data Flows, Python, and SQL to process large volumes of logistics and supply chain data efficiently.
- Developed and optimized complex SQL queries, stored procedures, and database objects in Azure SQL Database and Azure Synapse Analytics to support data warehousing and analytics workloads.
- Implemented secure credential management using Azure Key Vault and integrated Azure DevOps for CI/CD pipeline deployment and version control.
- Monitored and optimized ADF pipeline executions and query performance, ensuring high data reliability, scalability, and SLA compliance.

Project: 3M Company – E-Commerce Analytics & Data Warehousing

Environment: SQL, T-SQL, Azure SQL Database, ADF, ADLS Gen2, Azure Synapse Analytics, Microsoft Fabric (Lakehouse, Warehouse, Pipelines, Notebooks), Performance Tuning, Stored Procedures

- Analyzed business requirements and translated them into database schemas and SQL-based data solutions to support e-commerce analytics and BI reporting.
- Developed and optimized complex SQL queries, stored procedures, views, and functions to process and transform large volumes of transactional data.
- Performed ETL operations using SQL and Azure Data Factory to move and transform data from source systems into Azure SQL Database and Synapse Analytics.
- Implemented data cleansing, aggregation, and transformation logic using SQL to prepare structured datasets for analytics and Power BI reporting.
- Optimized SQL query performance using indexing strategies, query tuning, and execution plan analysis to improve database efficiency.
- Collaborated with .NET applications and reporting teams, enabling CRUD operations and Power BI integrations for secure and scalable data access.
- Worked with Microsoft Fabric components including Lakehouse, Data Engineering, Warehouse, Pipelines, and Notebooks for modern analytics workloads.

EDUCATION

Bachelor of Technology (B.Tech)

Kallam Haranadha Reddy Institute of Technology, Guntur, Andhra Pradesh

DECLARATION

I hereby declare that all the information provided above is true and correct to the best of my knowledge and belief.
